

SMART VISITOR MANAGEMENT SYSTEM

Professional, secure and fully integrated VMS for modern buildings

STREAMLINE VISITOR EXPERIENCE | ENTERPRISE-GRADE SECURITY

Streamlined Access
(Seamless Web & Kiosk Entry)

Instant Verification
(AI-Powered Identity & Recognition)

Unified Security
(Multi-Tenant, Real-Time Screening)

Efficiency & Compliance
(Fast & Secure Check-In, Data Protection)

VYSYNC

SMART VISITOR MANAGEMENT SYSTEM

Product Overview

Visitor Management System (VYSYNC) streamlines the entire visitor journey from pre-registration to check-out while integrating tightly with Building Management and Access Control systems. Built on modern web technologies, it provides a real-time, unified view for security teams, receptionists, and tenants. Its modular architecture is designed to scale effortlessly from single-building deployments to enterprise-level, multi-site environments. With secure API integrations, VYSYNC ensures smooth connectivity with a wide range of third-party systems, enabling efficient, flexible, and future-ready operations.

Feature Highlight

100% Web-Based & Kiosk Ready

- Browser-based admin console
- Self-service kiosk for visitor registration

Enterprise-Grade Security

- Encryption for sensitive fields (ID, Email, Phone, Images)
- Rate-Limited APIs to protect against abuse

AI - OCR & Face Recognition

- OCR for MyKad/Passport to auto-capture visitor details
- Face image capture and matching for blacklist
- MRZ support to reduce manual typing errors

Powerful Operations Dashboard

- Live visitor count
- Real-time check-in/out board
- Exportable reports (CSV/PDF) for security audit and compliance

| Key Features

Full Web-Based & Kiosk Application

Seamless registration across all platforms, ensuring a smooth visitor experience from any device.

AI-OCR, Face Recognition & Hardware Ready

Supports RICOH fi-70F passport scanner & Logitech BRIO 100 webcam. OCR, MRZ reading, and blacklist matching.

Deep Integration

Native compatibility with access control systems enables real-time gate and door management, ensuring secure and efficient entry handling across facilities.

Multi-Tenant, Multi-Site Deployment

Scalable architecture designed for large-scale multi-site and multi-tenant building management.

| Why Choose VYSYNC?

Reduce Wait Times

Self-service kiosks and pre-registration cut visitor check-in to under 30 seconds.

Enhanced Security

Real-time blacklist screening, face matching, and encrypted data storage.

Full Compliance

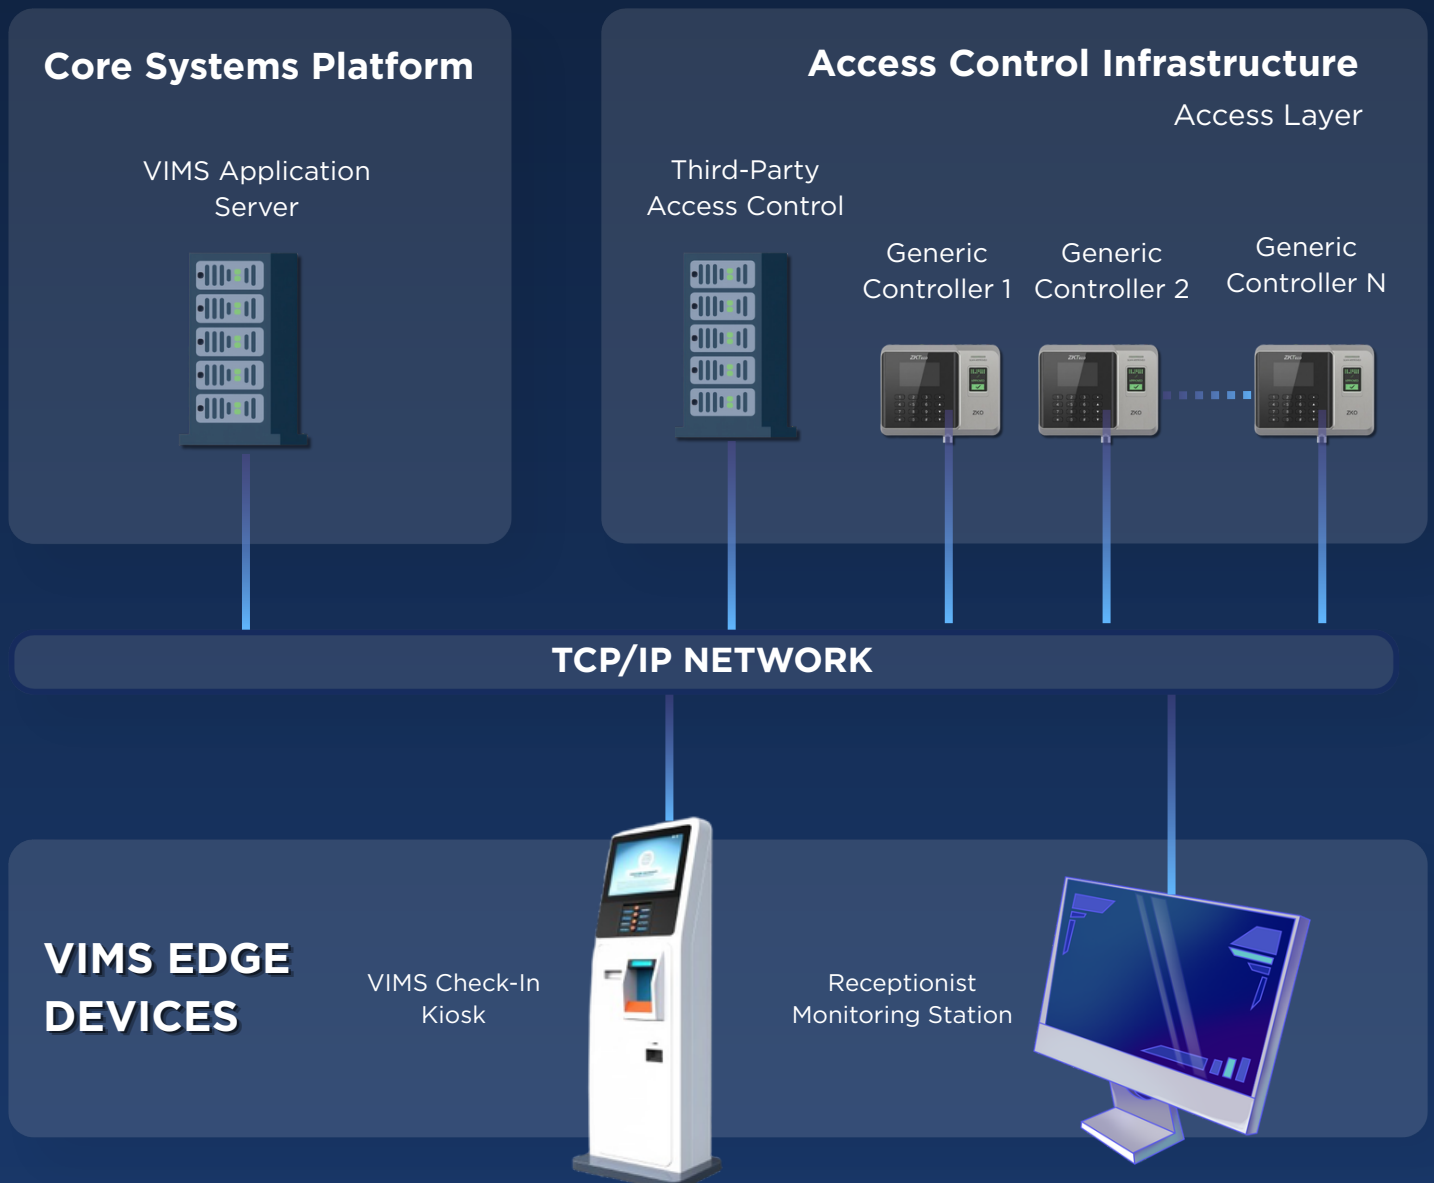

Audit-ready reports, PDPA-compliant data handling, and role-based access.

VYSYNC

VIMS Visit Process Flow

System Architecture

Professional VIMS Deployment & Hardware Specification

Typical Server Sizing (Large Deployment)

Processor	Intel Xeon E-2224 or equivalent
Memory RAM	8 - 16 GB DDR4
Hard Disk Space	1 TB SSD
Operating System	Linux (Ubuntu Server)

Typical Server Sizing (Medium Deployment)

Processor	Core i5 3.1Ghz (minimum), Core i7 3.5Ghz (Recommended)
Memory RAM	8GB DDR4
Hard Disk Space	500GB
Operating System	Windows Server 2016 Windows Server 2019 Windows Server 2022 Windows Server 2025

Network Requirements

Bandwidth	Minimum 10 Mbps dedicated
Protocol	HTTPS / TLS 1.2+
Ports	443 (HTTPS), 8080 (API Gateway)

Supported Hardware

VYSYNC supports industry-standard peripherals for seamless visitor processing

RICOH PA03841-B005 fi-70F

Small Footprint Flatbed A5 Document Scanner

Passport Scanner

- Scans passports, MyKad, and ID documents (A6 size)
- USB powered, compact form factor
- High-quality 600 dpi optical resolution
- Supports OCR & MRZ reading via VYSYNC
- PaperStream IP driver for enhanced image processing

LOGITECH BRIO 100 WEBCAM

Full HD 1080p Webcam - Graphite

Face Capture

- 1080p Full HD resolution for clear face capture
- Auto light correction for varied environments
- USB-A plug and play, no drivers needed
- Integrated with VYSYNC face recognition module
- Built-in privacy shutter for security compliance
